

Thriving with diabetes

Customer Testimonials 2015

Mark Heather

I have had the pleasure of using the Dario BG kit and app for 6 months, I am delighted by the flexibility and added control its has given me in my Diabetes management. This is the future available today, enough said!

Tony McCullough

Just over 23 years ago I got a call from my GP to call in and see at 4:30 after surgery. When I called he told me I had been diagnosed with type 2 Diabetes and to pick up a leaflet at reception on my way out. Wow! I was in complete shock; no one else in my family had it so I didn't know what to expect. It was just like he told me I had six weeks to live and he should have told me five weeks ago. I had to go home and make a lot of phone calls to find out what this Diabetes was all about. I was pushed from pillar to post around the medical profession; no one could help at all. I eventually got a test meter, lancets, and strips, you would have need a suitcase to carry everything in.

Three or four half brick size meters later, I saw an advert for Dario. I filled the necessary forms in and sent them off. A couple of months passed and I had forgot about it. One day I found this strange package in my hall, after opening it I found the Dario testing kit. After playing with it for a while I got it working. I just couldn't believe it, a Swiss Army Knife for Diabetes, fantastic. So small and compact you could it carry it in your pocket. No more half bricks to carry, most of the time you never took them anyway. I now carry my Dario everywhere and check my bloods more regularly. A great little piece of kit.

I visited the Dario Lounge on Facebook to see what that was all about. Another shock; it is full of people the same as you, all of a sudden you are not on your own, you have become part of a big diabetic family. Usually the first person to answer is Geary, welcoming you to the group and follows with a witty remark. I must say I have learned more from this group in the short time I have been here than I have from the so-called professionals. If some of the group can't help you out, then Sara Dario comes to the rescue.

In summing up, I am glad that I came in touch with Dario. The staff are very professional and caring. All the members of the Dario Lounge are brilliant and very helpful. Thank you Dario and all your tram from being there to help a suffering Diabetic Community. - UK

Gary and Jackie Kemp

Since I started using my Dario my blood control is amazing. It's pocket sized and comes with me everywhere unlike my older bulky tester.

Dario is so easy to use and the finger prick test is virtually painless. The Dario is a pleasure to use and helps me get the correct dose of insulin.

Dario means being in total control of your blood sugars.

I can recommend the Dario 100% it's the best tester I have ever used in over 15 years of being a diabetic.

My wife got me the Dario and I couldn't be happier it keeps me in total control.

I really do love your product and your Dario Lounge - I'm not in the best of health from things other than diabetes and the lounge makes me feel useful to people

Many thanks,

Gary Kemp (& Jackie Kemp)

Lorna Binns

Hi! Just wanted to say I received my Dario today and I love it and will be recommending it to my mum and friends. I take insulin 4 times a day and find it so useful to have the Dario in my bag with my insulin and have everything there that I need. It's by far the best glucose tester I've used and to have everything stored on my phone so no longer needing to write it down is fantastic, I can't thank you enough :)

Bob Cornelius

I have been using this product since the middle of this year, and I am seriously impressed with the device, the app and the backup and support behind it! It is so incredibly easy to use, as well as being compact and lightweight.

Basically, a tiny module plugs into your smartphone, which is a test strip reader, controlled by a free app on the phone! It provides accurate readings, tells you what percentage of your tests are within limits, and after 25 readings, will begin to predict HbA1c levels, which have shown to be accurate, and is perfect if, like me, you are looking to reduce HbA1c down to normal.

The app is customizable, so you can set your individual parameters, type(s) of insulin etc., and you can record insulin, carbs calories etc. The app also interacts with other fitness/exercise apps, so you have an all in one solution to keep your diabetes under control.

There is also an option for your phone to text a contact provided by you, if you record a low hypo! That's something you won't find in ordinary meters, what would you do in the middle of the night if you were alone and having a serious hypo?

It comes as a small, compact unit, containing meter, test strips and lancet unit in a pocket sized casing smaller than my phone!

There is a Facebook group for users, and Dario reps are regularly online there, providing instant support if required!

As a registered medical professional recently diagnosed with type 1.5/LADA, I'm still getting used to having diabetes, and changing a lifetime of eating habits, I also rigidly research and bench test any equipment before I start using it. My Dario and I are now inseparable, as it makes my life much easier, and isn't that what technology is for?

I may have diabetes, but my Dario helps to ensure that diabetes doesn't have me!

Dario one of the best monitors; it's very accurate.

I 100% trust this machine. Very light and compact easy to carry around.

Much easier to use with the Dario app and not forgetting it also estimates your A1C results. Very happy with it.

Good work Dario team! - UK

Katie Monk

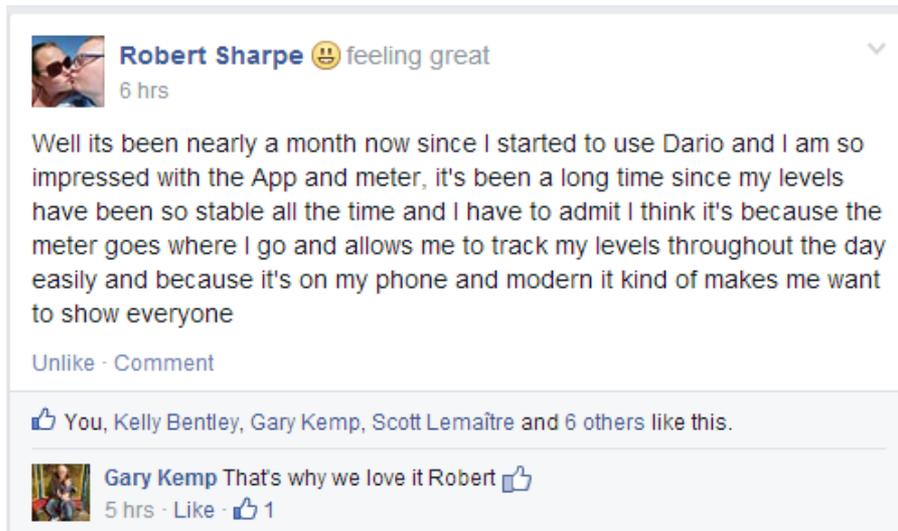

“I have just received my Dario and it is incredible! So small and easy to carry, amazing! If it is possible, some more lancets and strips would be brilliant! In September will I need to go to my doctor to change my prescription to get the new type of strips?”

The app is really useful, giving me great suggestions as to the amount of insulin I should give myself when my sugars are high. Overall an amazing adventure which brings hope for all diabetics for an easier lifestyle.” – New Zealand

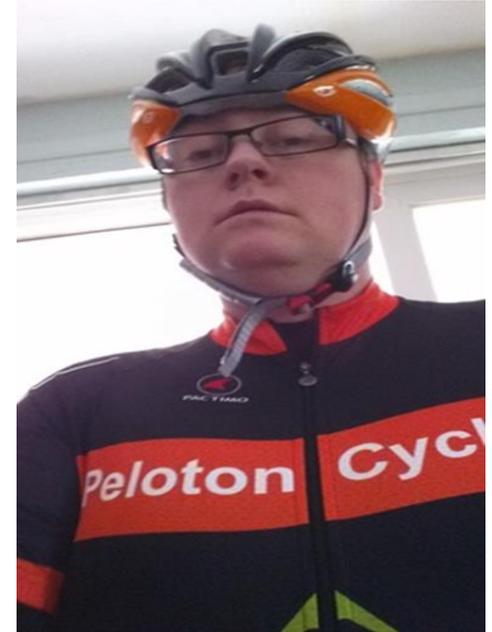

Robert Sharpe

I have been using the Dario now for almost a week and I can't get enough of it. It's light compact easy to use and accurate. It's great for the sports person as it fits pretty much any where.

A screenshot of a Facebook post by Robert Sharpe. The post includes a profile picture of Robert Sharpe, his name, a smiley face emoji, and the text "feeling great" with a dropdown arrow. Below this is the text "6 hrs" and a paragraph of text: "Well its been nearly a month now since I started to use Dario and I am so impressed with the App and meter, it's been a long time since my levels have been so stable all the time and I have to admit I think it's because the meter goes where I go and allows me to track my levels throughout the day easily and because it's on my phone and modern it kind of makes me want to show everyone". Below the text are the options "Unlike · Comment". At the bottom of the post, it says "You, Kelly Bentley, Gary Kemp, Scott Lemaître and 6 others like this." Below this is a comment from Gary Kemp: "That's why we love it Robert" with a thumbs up icon, and "5 hrs · Like · 1".

David Spalton

I am really enjoying using the device. So much more practical than any other device that I've used, and a lot easier to use with the app, and managing my life with diabetes

Type 1 diabetic 28 years old

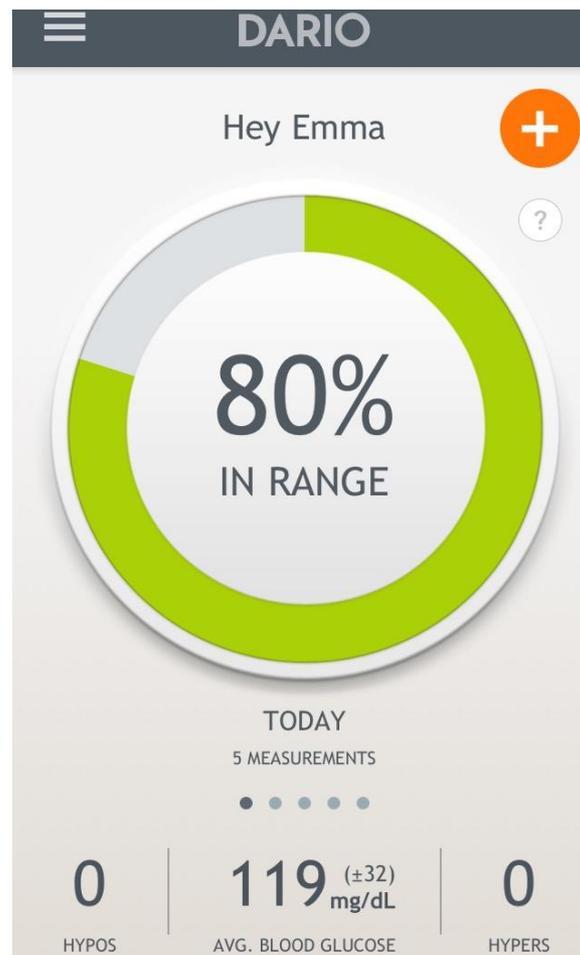

Fiona and Emma Murray

“Emma and I would like to thank the Dario team for introducing her to Dario. This has been a really helpful tool and App, particularly as it is all able to be done on an iPhone. This has meant Emma only needs to remember to take her phone and the Dario gadget when she leaves the house. The App has been great in keeping track of when she tests, what she eats and gives an average over time. She confidently uses this at and during school, and I am able to also see that she is testing regularly. As her confidence in the device and knowledge of the App grows, it has become a lot more useful and user-friendly for a teenager and in Emma's words, she is enjoying it!

Thank you Dario”

Teenager and T1 diabetic for 7 years, New Zealand

Vishal Thakersee

I am enjoying having a combination of device and app with excellent helpful blood sugar analysis – there is nothing else close that is so helpful in empowering the Diabetes patient.

Paul Barrett

I've been using the Dario smart meter for two months now, in that time I have seen a vast improvement of my hbc1a levels.

With my old meters I wasn't testing as much as should have been, they are just too bulky to carry around so I was guessing how much insulin I was taking say if I was out for dinner.

The Dario smart meter fits perfectly in with everyday life, its just so easy to carry around with you.

Its a true all in one meter to have the strips and the lancet all in one small package is amazing a vast improvement on all my old bulky meters.

I do literally carry the meter everywhere with me.

The iPhone app is another big selling point to me.
The app is so easy to use all the information for you and your diabetes care team is right there on your phone .

The blood results are very clear to read, its very easy to enter what you are eating and the app will give you a recommended dosage of insulin based on your blood level and what you are eating.

I find this the most useful feature of the app.

I would and have recommended this meter to fellow type 1 sufferers. - UK
